

Expansion Project

Queen Eleanor's C of E Junior School

The construction of two single storey classroom blocks for this school in Guildford. We were appointed by the Good Shepherd Trust which represents The Diocese of Guildford.

Each of the classroom blocks contained two classrooms and a corridor area. The external works included drainage and soakaways, as well as enlargement of the staff parking area.

Wishing to minimise disruption, the contract duration was a concern for the school but concerns were allayed when our team duly delivered the project on programme and just in time for the new school year.
